

Nocturnal *adventurers*

Discovery, travel, escape, JEANRICHARD creates watches for everyday explorers. For all those who want to live life to the fullest, seizing the best from every moment. Because adventure doesn't stop when the sun goes down, JEANRICHARD introduces three new versions of its 1681 and Terrascope models to complement any night-time expeditions with style and assurance. Three companions for urban, sporting or elegant nights - perfect examples of the JEANRICHARD "philosophy of life".

Functions: hour, minute, second, date

Black matt dial

Black polished indexes and numerals
Black polished hands with beige luminescent material

Black Barenia® calfskin

Black PVD-coated stainless steel folding buckle

1681 with black DLC case:

Night in the City

A homage to the very first watch created by Daniel Jeanrichard at the end of the 17th century, the 1681 reinvents tradition in a new, highly original colour of the night. A dynamic, refined and urban look for nighttime walks in well-lit streets or for discovering the more secret corners of a city after-hours, it is the perfect companion to those urban characters fuelled by the electric energy of cities and their alluring facets. The steel cushion case is decorated with a black DLC coating with a matt, powder-coat surface. Its entirely micro beaded finish adds strength to the modern but discreet style. Only essential references, the leaf-shaped hour and minute hands and the date, stand out against the black dial, thanks to a luminescent beige coating. Within this case of hitherto unseen elegance beats a JR1000, automatic winding movement, made in-house, with a black rotor which has an exclusive décor visible through the transparent case-back.

Terrascope with black DLC case:

Night in the Open Air

A starry night in the immensity of the desert, a moonless evening on the world's highways, the thrill of the unknown and the unexplored, the Terrascope – JEANRICHARD's flagship model – shares the most beautiful night-time hours for everyday explorers who wish to savour every moment of the day in a new edition finished with a sleek black DLC coating. The alternating «vertical satin» finish on the flat surfaces and sandblasted finish on the bevels subtly underline the watch's original design, with its robust construction in several parts and its combination of a cushion case with a round glass. The indexes and hands are clearly distinguishable on a matt black dial, with cut-outs that make them stand out and a white luminescent coating. The sporty touch is completed by a black rubber strap with a folding clasp. The mechanical movement with automatic winding ensures accuracy and reliability twenty-four hours a day.

Technical specifications

Sandblasted and vertically satin-finished black – DLC-coated stainless steel case

44.00 mm

luminescent material

Black alligator strap

Stainless steel folding buckle

Terrascope bi-colour with black dial: **Night on the Chic-Sporty Side**

With a steel case illuminated by case sides in pink gold and a black dial, the new Terrascope bi-colour re-interprets the night in a sportive yet elegant spirit. A perfect blend of class and laid-back attitude as well as luxury and authenticity, this model unveils a subtle touch of the «gentleman farmer». The sophisticated construction of the case in multiple parts alternates «vertical satin» surfaces with polished bevels to play with light. The matt black case-back makes the clean geometry of the dial stand out with its applied numerals and big hands covered with pink gold and a luminescent coating. The black alligator strap, with folding clasp, completes the harmony. The mechanical movement with automatic winding ensures that the night-time and day-time hours are told with unerring accuracy. All the JEANRICHARD art of living in a watch with a distinctively assertive character.
