

The JEANRICHARD 1681 watch: *Blue horizons!*

With its exclusive Manufacture movement combined with a tonneau-shaped case with a modern and original geometrical design, the 1681 watch reinvents tradition with an eye to the future. Just like the first watch created by Daniel Jeanrichard back in the late 17th century. Today, JEANRICHARD reinterprets this truly stylish watch model, adorning it with a lively, dynamic touch of blue. The blue of wide horizons – the vast open spaces that JEANRICHARD aficionados, those adventurers of everyday existence, love to discover and explore. The blue of a cloudless sky and of enjoying living life intensely, making the most of every instant.

60320-11-451-HB40

The 1681 Blue model is available in two versions. Perfect harmony is to be found in the model with a steel case, with its large seconds hand on a blue dial and its matching Barenia calfskin strap, fitted with a folding clasp. The watch model with its case in pink gold has an exquisite touch with its small-second at 9 o'clock on a blue dial, as well as a blue alligator-skin strap. The sophisticated design of the case in several parts allows a subtle alternation of polished and satin finishes. The self-winding JR1000 Manufacture movement and its originally decorated rotor are visible through a transparent case back. JEANRICHARD's entire philosophy of life – this time with the right touch of blue.
